■ construction

Drawer Box

Solid 5/8" hardwood with dovetail joints with a captured 1/4" plywood bottom sets the cabinet industry standard for quality American cabinetry providing long lasting strength and durability combined with the beauty of dovetail joinery.

I-Beam Base Construction

Integrated 1/2" plywood I-beams secure all four sides of base cabinets. I-beams provide additional strength, helps keep the cabinet square during shipping and installation, and help withstand the weight of countertops.

Drawer Glides (Runners)

6 Square Cabinets uses industry-leading Blum® drawer guides. Known for high quality, Blum glides are strong to support 90 lbs. The full-extension, undermount glides feature a soft-close mechanism and provide complete access to drawer contents.

Hinges

Blum® softclose COMPACT BLUMOTION hinges close silently every time and have been certified tested to open and close 25,000 times. 6-way adjustability offers easy adjustments over a lifetime of use.

Cabinet Interior

6 Square Cabinets uses 30-g melamine for cabinet interiors. Melamine wipes clean, is extremely durable, and will not absorb moisture.

All Plywood Box

6 Square Cabinets offers premium plywood 1/2" sides, 3/8" full-height cabinet back panel and 3/4" full depth shelves. Plywood weighs less, provides additional strength and offers more holding power compared to particleboard.

Sides: 1/2-inch plywood; never particleboard	Drawer Glides: Blum® soft-close, full-extension undermount
Back Panel: 3/8-inch plywood; never particleboard	Hinges: Blum® soft-close, steel, 6-way adjustable
Faceframe: solid hardwood	Shelves: full-depth plywood; never particleboard
Door Construction: Solid hardwood stiles & rails	Customization: Built-to-fit with option to customize
Wood Species: maple, cherry, oak, birch	Assembly: Factory-assembled
Drawer Box: 5/8-inch hardwood; dovetail joints	Shipping: Free on most orders*
Interior: Easy-to-clean Melamine	Warranty: Limited Lifetime warranty
